D. Reinforced Concrete Roof Deck.
E. Other:
F. Unknown or unidentified.
G. No attic access.
<ul> <li>4. Roof to Wall Attachment: What is the WEAKEST roof to wall connection? (Do not include attachment of hip/valley jacks within 5 feet of the inside or outside corner of the roof in determination of WEAKEST type)</li> <li>A. Toe Nails</li> <li>Truss/rafter anchored to top plate of wall using nails driven at an angle through the truss/rafter and attached to the top plate of the wall, or</li> </ul>
Metal connectors that do not meet the minimal conditions or requirements of B, C, or D
Minimal conditions to qualify for categories B, C, or D. All visible metal connectors are:
Secured to truss/rafter with a minimum of three (3) nails, and
Attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a ½" gap from the blocking or truss/rafter and blocked no more than 1.5" of the truss/rafter, and free of visible severe corrosion.
B. Clips
Metal connectors that do not wrap over the top of the truss/rafter, or
Metal connectors with a minimum of 1 strap that wraps over the top of the truss/rafter and does not meet the nail position requirements of C or D, but is secured with a minimum of 3 nails.  C. Single Wraps
Metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side and a minimum of 1 nail on the opposing side.
D. Double Wraps
Metal Connectors consisting of 2 separate straps that are attached to the wall frame, or embedded in the bond beam, on either side of the truss/rafter where each strap wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side, and a minimum of 1 nail on the opposing side, or  Metal connectors consisting of a single strap that wraps over the top of the truss/rafter, is secured to the wall on both sides, and is secured to the top plate with a minimum of three nails on each side.  E. Structural: Anchor bolts structurally connected or reinforced concrete roof.
F. Other: G. Unknown or unidentified
H. No attic access
H. No attic access
<b>Roof Geometry:</b> What is the roof shape? (Do not consider roofs of porches or carports that are attached only to the fascia or wall of the host structure over unenclosed space in the determination of roof perimeter or roof area for roof geometry classification).
A. Hip Roof Hip roof with no other roof shapes greater than 10% of the total roof system perimeter. Total length of non-hip features:feet; Total roof system perimeter:feet
B. Flat Roof Roof on a building with 5 or more units where at least 90% of the main roof area has a roof slope of less than 2:12. Roof area with slope less than 2:12sq ft; Total roof areasq ft
C. Other Roof Any roof that does not qualify as either (A) or (B) above.
<ul> <li>6. Secondary Water Resistance (SWR): (standard underlayments or hot-mopped felts do not qualify as an SWR)</li> <li>A. SWR (also called Sealed Roof Deck) Self-adhering polymer modified-bitumen roofing underlayment applied directly to the sheathing or foam adhesive SWR barrier (not foamed-on insulation) applied as a supplemental means to protect the dwelling from water intrusion in the event of roof covering loss.</li> <li>B. No SWR.</li> <li>C. Unknown or undetermined.</li> </ul>

<sup>\*</sup>This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

7. **Opening Protection:** What is the **WEAKEST** form of wind borne debris protection installed on the structure? **First**, use the table to determine the weakest form of protection for each category of opening. **Second**, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings **and** (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable.

Opening Protection Level Chart		Glazed Openings				Non-Glazed Openings	
oper form	e an "X" in each row to identify all forms of protection in use for each sing type. Check only one answer below {A thru X), based on the weakest of protection {lowest row) for any of the Glazed openings and indicate weakest form of protection {lowest row) for Non-Glazed openings.	Windows or Entry Doors	Garage Doors	Skylights	Glass Block	Entry Doors	Garage Doors
N/A	Not Applicable- there are no openings of this type on the structure		$\langle$	$>\!\!<$			
Α	Verified cyclic pressure & large missile {9-lb for windows doors/4.5 lb for skylights)	$\times$			$\times$	$>\!\!<$	$\times$
В	Verified cyclic pressure & large missile {4-8 lb for windows doors/2 lb for skylights)						
С	Verified plywood/OSB meeting Table 1609.1.2 of the FBC 2007						
D	Verified Non-Glazed Entry or Garage doors indicating compliance with ASTM E330, ANSI/DASMA 108, or PA/TAS 202 for wind pressure resistance						
N	Opening Protection products that appear to be A or B but are not verified						
N	Other protective coverings taht cannot be identified as A, B, or C						
х	No Windborne Debris Protection						

1	<u>A.</u>	Exterior Openings Cyclic Pressure and 9-lb Large Missile (4.5 lb for skylights only) All Glazed openings are
		protected at a minimum, with impact resistant coverings or products listed as wind borne debris protection devices in the
		product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level A in the table above).
		<ul> <li>Miami-Dade County PA 201, 202, and 203</li> </ul>
		• Florida Building Code Testing Application Standard (TAS) 201, 202, and 203
		<ul> <li>American Society for Testing and Materials (ASTM) E 1886 and ASTM E 1996</li> </ul>
		<ul> <li>Southern Standards Technical Document (SSTD) 12</li> </ul>
		<ul> <li>For Skylights Only: ASTM E 1886 and ASTM E 1996</li> </ul>
	_	• For Garage Doors Only: ANSI/DASMA 115
	<b>V</b>	A.1. All Non-Glazed openings classified as A in the table above, or no Non-Glazed openings exist
		A.2. One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level B, C,
		N, or X in the table above A.3. One or More Non-Glazed Openings is classified as Level B, C, N, or X in the table above
	<u>B.</u>	Exterior Opening Protection- Cyclic Pressure and 4 to 8-lb Large Missile (2-4.5 lb for skylights only) All
		Glazed openings are protected, at a minimum, with impact resistant coverings or products listed as windborne debris
		protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements
		of one of the following for "Cyclic Pressure and Large Missile Impact" (Level B in the table above):
		<ul> <li>ASTM E 1886 and ASTM E 1996 (Large Missile 4.5 lb.)</li> <li>SSTD 12 (Large Missile 4 lb. to 8 lb.)</li> </ul>
		• For Skylights Only: ASTM E 1886 and ASTM E 1996 (Large Missile - 2 to 4.5 lb.)
		B.1. All Non-Glazed openings classified as A or B in the table above, or no Non-Glazed openings exist
		B.2. One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level C, N, or X in the table above
		B.3. One or More Non-Glazed openings is classified as Level C, N, or X in the table above

C. Exterior Opening Protection- Wood Structural Panels meeting FBC 2007 All Glazed openings are covered with plywood/OSB meeting the requirements of Table 1609.1.2 of the FBC 2007 (Level C in the table above).

C.2. One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level N or X

Inspectors Initials: J.C. Property Address: CONFIDENTIAL

C.1. All Non-Glazed openings classified as A, B, or C in the table above, or no Non-Glazed openings exist

C.3. One or More Non-Glazed openings is classified as Level N or X in the table above

in the table above

N. Exterior Opening Protection (unverified shutter) protected with protective coverings not meeting the requestion (Answer "A" or "B" with no documentation of compliance of the Non-Glazed openings classified as Level A, B, C, or one of Non-Glazed openings classified as Level D the table above of Non-Glazed openings is classified as Level Non-Glazed openings is classified as Level Non-Glazed openings of the Non-Glazed openi	irements of Answer "A", "B", or C" te (Level N in the table above).
